

Calling all Nature Enthusiasts!

Below is the schedule of the Cape Coral Bird surveys and the first ever butterfly surveys for this coming summer (2014). In May and June we will be surveying the mangroves of Cape Coral looking for local birds. In July and August we will be surveying the City's numerous butterfly species. All levels of experience welcome and data will be recorded by City staff. Any resident interested in assisting in the surveys should email Katie McBride at kmcbride@capecoral.net, 242-3547 or Honey Archey at harchey@capecoral.net, 549-4606. All citizen scientists are volunteers and will be required to sign waivers and provide their own equipment (binoculars, reference books, drab-colored clothing, field shoes, and kayaks for paddle surveys).

Join us for this exciting chance to learn and survey Cape Coral's wonderful wildlife!
