

NOTICE TO CONTRACTORS

Effective May 12, 2008

Pool and Spa

Any General, Building or Residential Contractor that applies for a Pool/Spa or Fountain permit (Commercial or Residential) is required by the State DBPR to have a Pool, Plumbing and Electrical contractor listed as subcontractors.

The scope of work for the CGC, CBC, or CRC is limited to the structure only. All other components must be completed by a licensed pool, plumbing or electrical contractor depending on the scope of work. The pool and plumbing contractor will be required to submit a subcontractor verification form. If the pool contractor will be completing the plumbing work please check off both boxes on the subcontractor form.

All permits issued will include a plumbing rough inspection. The plumbing inspections can be performed by either a pool or plumbing contractor. These changes are a result of a requirement through the DBPR and building code regulations.
