

LP Tank/Natural Gas - Residential Permit Guidelines

Gas Contractor or Owner/Builder may apply for permit.

- Miscellaneous application.
- NOC required if value is \$2500 or greater.
- Owner Builder Affidavit (if homeowner).
- Two (2) copies of site plan showing the following:
 - Location of LP tank.
 - Existing buildings or structures
 - Distance to property lines, PUE, and structures.
 - Whether tank is above or below ground.
- Two (2) copies of LP plan details:
 - Identify tank(s) foundation with details.
 - Location of piping, gas connections & size of line piping
 - All openings to structure – distance from openings (doors/windows)
 - Distance from ignition sources.
 - Provide a list of materials, including tank type (vertical/horizontal), certificate #'s and operating pressures.
 - Appliance legend with BTU's and corresponding labels that match drawings.
 - Include regulator manufacturer and model number.
 - Indicate depth of pipe and tracer wire if necessary.
 - Detail of underground tank installation, including method and materials of securing or attaching.
 - Size and material of any necessary sleeving.
 - Detail of any driveway dome required.

ALL INFORMATION MUST BE CLEARLY LEGIBLE.

*****NOTE:** This is not a complete list. Depending on specific job, additional details such as isometrics, pad size, remote venting . . . etc. may be required. Simply stating "Compliance with NFPA 54 & 58 and local/state codes" is not adequate.

Description:

- Specify if for present or future generator (or other) and if being capped or connected to something.
